***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

**Group I: Claims 1-6, draw to a semiconductor device, classified in class 257, and subclass 288.**

**Group II: Claims 7-18, draw to a method of manufacturing a semiconductor device, classified 438, and subclass 197.**

2. Inventions II and I are related as process of making and product/device made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case unpatentability of the group I invention would not necessarily imply unpatentability of the group II invention, since the device of the group I invention could be made by the processes materially different from those of the group II invention. For example, claim 7, performing thermal processing at a temperature of more than 500 °C while covering said gate electrode with said predetermined film.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 2818

application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
